Paper 2 (Extended)

February/March 2024

MARK SCHEME

Maximum Mark: 70

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the February/March 2024 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of **7** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptions for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

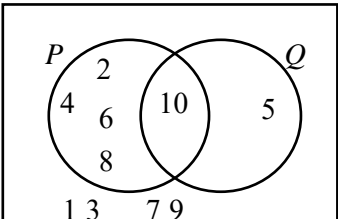

Mathematics-Specific Marking Principles

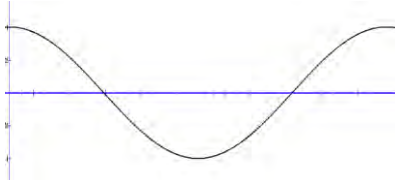

- 1 Unless a particular method has been specified in the question, full marks may be awarded for any correct method. However, if a calculation is required then no marks will be awarded for a scale drawing.
- 2 Unless specified in the question, non-integer answers may be given as fractions, decimals or in standard form. Ignore superfluous zeros, provided that the degree of accuracy is not affected.
- 3 Allow alternative conventions for notation if used consistently throughout the paper, e.g. commas being used as decimal points.
- 4 Unless otherwise indicated, marks once gained cannot subsequently be lost, e.g. wrong working following a correct form of answer is ignored (isw).
- 5 Where a candidate has misread a number or sign in the question and used that value consistently throughout, provided that number does not alter the difficulty or the method required, award all marks earned and deduct just 1 A or B mark for the misread.
- 6 Recovery within working is allowed, e.g. a notation error in the working where the following line of working makes the candidate's intent clear.

**Abbreviations**

cao	correct answer only
dep	dependent
FT	follow through after error
isw	ignore subsequent working
oe	or equivalent
SC	Special Case
nfww	not from wrong working
soi	seen or implied

Question	Answer	Marks	Partial Marks
1	7h 28min	1	
2	24.352	1	
3	$3m+10k$ final answer	2	B1 for $3m$ or $10k$ in final answer or for $3m+10k$ seen and spoilt
4	$a = 18 \quad b = 10 \quad c = 4 \quad d = 9$	4	B1 for each If 0 scored, SC1 for b or $c = 4, 5$ or 10
5(a)	54	2	M1 for $\frac{3}{20}[\times 360]$ oe or $\frac{360}{20}[\times 3]$ oe
5(b)	$\frac{17}{20}$ oe	1	
6	$\begin{pmatrix} -10 \\ 3 \end{pmatrix}$ final answer	1	
7	Positive	1	
8(a)	$-2 \quad 1 \quad 6$	2	B1 for any 2 correct in correct position If 0 scored SC1 for $-3 - 2 \quad 1$
8(b)	3^{n-1}	2	B1 for 3^{an+k} , $a \neq 0$ or 3^c for any integer $c > 1$
9	$(4, 3)$	2	B1 for each or M1 for $3 = 2x - 5$ or better
10	26.6	2	M1 for $\frac{1}{2} \times (5.3 + 8.7) \times 3.8$ oe

Question	Answer	Marks	Partial Marks
11	$\frac{5}{4}$ or $\frac{1}{4} + \frac{1}{6}$	B1	Correct method for dealing with mixed number Allow $\frac{5k}{4k}$
	$\frac{15}{12}$ and $\frac{10}{12}$	M1	Correct method to find common denominator e.g. $[1]\frac{3}{12}$ and $\frac{10}{12}$
	$\frac{5}{12}$ cao	A1	
12	14	1	
13	287	2	M1 for $360 - (180 - 107)$ oe or indicates correct angle on a diagram
14	146 cao	3	M2 for $\frac{1750 + 480}{55 \times 1000} \times 60 \times 60$ oe or M1 for distance = $1750 + 480$ oe or $\frac{55 \times 1000}{60 \times 60}$ oe soi or correctly writing <i>their</i> whole number of seconds from a more accurate answer seen
15(a)(i)	reflection $x = -2$	2	B1 for each
15(a)(ii)	enlargement [sf] $\frac{1}{2}$ $(-3, -4)$	3	B1 for each
15(b)	Image at $(0,3)$, $(-4,3)$, $(-3,-1)$	2	B1 for correct size and orientation, wrong centre
16		2	B1 for two sections correct out of four

Question	Answer	Marks	Partial Marks
17	138.425	4	M1 for mid-points soi (110, 125, 140, 170) M1 for use of Σfh with h in correct interval including both boundaries M1 for (dep on 2nd M1) for Σfh , 200
18	$14x^3$	2	B1 for $14x^k$ or $7x^3$ or $2x^3$
19	2325	3	M2 for correct method for total area e.g. $\frac{1}{2} \times 15 \times (190 + 120)$ or M1 for correct method for one area e.g. $\frac{1}{2} \times 20 \times 15$, $(140 - 20) \times 15$ or $\frac{1}{2} \times (190 - 140) \times 15$ oe
20	5.36 or 5.360 to 5.361	2	M1 for $\frac{1}{2} \times 5.6 \times 4.9 \times \sin 23$ oe
21(a)	$\frac{1}{5}$ oe	1	
21(b)	$64x^9$	2	B1 for $64x^k$ or kx^9 as final answer or correct answer spoiled
22	$[y =] \frac{24}{(x+3)^2}$ oe final answer	2	M1 for $y = \frac{k}{(x+3)^2}$
23(a)	 Correct sketch to go through (0, 1), close to (360, 1) and reasonably close to (180, -1)	2	M1 for correct cosine curve shape through (0, 1)
23(b)	72.9 and 287.1	2	B1 for one correct If 0 scored, SC1 for two angles with a sum of 360

Question	Answer	Marks	Partial Marks
24	$[a =] 64$ $[b =] -8$	2	B1 for each or for both $(x - 8)^2$ and $x^2 - 16x + 64$
25	$\frac{2}{3}$ oe nfw	4	<p>M3 for $\frac{2}{13} \times \frac{11}{12} + \frac{5}{13} \times \frac{8}{12} + \frac{6}{13} \times \frac{7}{12}$ oe</p> <p>or $1 - \left(\frac{2}{13} \times \frac{1}{12} + \frac{5}{13} \times \frac{4}{12} + \frac{6}{13} \times \frac{5}{12} \right)$ oe</p> <p>or M2 for sum of three or more correct product pairs and no incorrect pairs</p> <p>or for $\frac{2}{13} \times \frac{1}{12} + \frac{5}{13} \times \frac{4}{12} + \frac{6}{13} \times \frac{5}{12}$ and no other pairs</p> <p>or M1 for $\frac{j}{13} \times \frac{k}{12}$</p> <p>If 0 scored SC1 for answer $\frac{104}{169}$ oe</p>
26	$y = \frac{2}{3}x + \frac{4}{3}$ final answer	5	<p>B1 for midpoint (4,4) soi</p> <p>M1 for [gradient $AB =$] $\frac{7-1}{2-6}$ oe</p> <p>M1 for [$m =$] $\frac{-1}{\text{their gradient of } AB}$</p> <p>M1 for substituting <i>their</i> midpoint into $y = (\text{their } m)x + c$ dep on at least M1 earned</p>
